March 17, 2014

Dear Pittsboro Water Customers:

It is with great pleasure to announce that the Pittsboro Water Treatment Plant had another successful stage 2 TTHM and HAA5's testing quarter. We are also extremely honored to announce that both TTHM and HAA5's were the lowest ever recorded in the history of water treatment for the Town of Pittsboro! This is a celebrated accomplishment for the Water Treatment Team and the Town of Pittsboro.

Here are the final results from the state laboratory for the 1st quarter of 2014:

TTHM's: (Must be below **0.080** mg/L)
Location 1 Taco Bell - 0.009 mg/L
Location 2 Town Hall - 0.014 mg/L

HAA5's: (Must be below **0.060** mg/L)
Location 1 Taco Bell - 0.006 mg/L
Location 2 Town Hall - 0.010 mg/L

The Pittsboro Water Treatment Plant has now had 18 consecutive quarters of compliance for TTHM's and 13 quarters for HAA5's. Our successful team was led by our two Senior Water Treatment Operators, Curtis Hall and Boyd Hawley. Water Treatment Operators Reed Blackburn, Jesseca Ketchum, Ryan Perkins, and our Water Quality Technician Andrew McGrane contributed greatly to our success. We continue to produce a high quality product for our community due to enhanced flushing, carbon application and exemplary treatment by our operators. All credit should be given to our staff - they sincerely care about the water quality in our community. These results are exceptionally difficult to achieve and rank us with some of the highest water quality in the region.

Please share the good news!

Thanks,

Adam Pickett

Water Treatment Superintendent
