

TO: Mayor Perry and the Town Board of Commissioners
FROM: Fred Royal, PE, CFM, Town Engineer
DATE: December 12, 2016
SUBJECT: Sewer Allocation Request

Discussion

The Town has two requests for sewer allocation for consideration:

1. Terry Taylor House on Small Street – Requesting 100 gallons per day (GPD) for an office.
2. Whispering Meadows Development - Phase One Only – 16 lots – 5,280 gallons per day

Recommendation

Staff recommends the Town Board of Commissioners approve both of these sewer allocation requests, totaling 5,380 GPD. They will be required to begin construction within one year of this request or they are subject to losing these allocations per Town policy. The current sewer capacity availability is 60,195 gallons per day.
