RE: Northwood High School Facility Sewer Allocation Request
For the Chatham County Board of Education

Dar Mr. Royal,

This letter is an official request from Chatham County Schools for a sanitary sewer allocation of 1,125 (one thousand one hundred twenty-five) gallons per day of wastewater capacity to serve the needs of Northwood High School over the next year. Northwood High School currently has an enrollment of 1,327 students and it's projected that these numbers will increase to 1,371 students by the end of the year. I understand that the sewer allocation will be done yearly over the next five years. I am attaching the student projections from Chatham County Schools as of August 2016.

I have also attached documentation for the wastewater design flow rates.

Please contact me if you have any questions or need additional information.

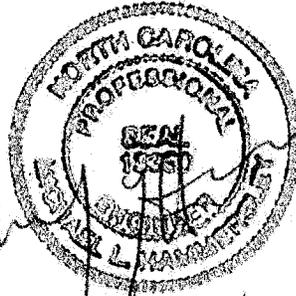

Sincerely,

Michael L. Hammersley, P.E.
Principal
